INDEX

TO THE

MATHEMATICAL GAZETTE

No. 248, FEBRUARY 1938—No. 252, DECEMBER 1938.

COMPILED BY MRS. T. A. A. BROADBENT.

1. Articles.
2. Mathematical Notes.
3. Reviews and Notices.
4. News of Branches.
5. Gleanings Far and Near.
6. The Library.
7. Obituary Notices.
8. Correspondence.
9. Miscellaneous.

ARTICLES, ETC.

AUTHOR.	TITLE.	PAGE.
A. A. Krishnaswami Ayyangar.	On the partition of sets of points on a rectangular hyperbola.	42
M. Black.	The relevance of mathematical philosophy to the teaching of mathematics.	149
E. Borel.	New geometry for Germany.	73
A. Buxton.	Heights, distances and deflections.	466
H. S. Carslaw.	Operational methods in mathematical physics.	264
J. R. Colthurst.	Relativity and the camera.	454
W. J. Dobbs.	Morley's triangle.	50
N. R. C. Dockeray.	The need for reform in the teaching of mathematics.	321
	The law of quadratic reciprocity.	440
I. M. H. Etherington.	Edinburgh Mathematical Society: St. Andrews Colloquium.	482

Author.	Title.	Page.
W. C. Fletcher.	Euclid.	58
L. N. G. Filon.	Presidential Address, 1938. Mass and Force in Newtonian mechanics.	9
H. G. Forder.	Conics and cubics.	479
N. M. Gibbins.	The Feuerbach quadrilateral.	97
	Another eternal triangle.	123
R. L. Goodstein.	Geometry in modern dress.	217
	A class of Diophantine equations.	338
G. H. Grattan-Guinness.		
	"A weighty matter".	332
D. R. Hartree.	The mechanical integration of differential equations.	342
L. Hogben.	Clarity is not enough.	105
W. O. Kermack and A. G. McKendrick.		
	Some properties of points arranged at random on a Möbius surface.	66
J. P. McCarthy.	A difficult converse.	365
A. G. McKendrick.	*See* W. O. Kermack.	
N. W. McLachlan.	Submarine cable problems solved by contour integration.	37
	Historical note on Heaviside's operational method.	255
F. G. Maunsell.	A problem in cartophily.	328
Sir Percy Nunn.	Notes on the place of similarity in school geometry.	234
E. G. Phillips.	On differentiation from first principles.	374
D. K. Picken.	Commonsense of number.	225
F. B. Pidduck.	New geometry for Germany.	73
R. T. Robinson.	Theorems on co-axal circles and co-axal spheres.	429
D. H. Sadler.	New geometry for Germany.	73
J. Thomson.	On inaccuracies in style which frequently occur in mathematical composition. (Reprinted from *Elementary Treatise on Algebra*, 1850).	426
S. F. Trustram.	"That dull subject, mathematics".	250
C. J. de la Vallée Poussin.		
	Potentiel et problème généralisé de Dirichlet.	17
G. N. Watson.	Cubic envelopes derived from systems of conics.	261
F. J. Wood.	Impressions of school mathematics in the United States.	461

The relative value of pure and applied mathematics. 132

Discussion:

W. G. Bickley (p. 132); C. G. Nobbs (p. 136); K. I. Sayers (p. 140); R. M. Gabriel (p. 143); K. S. Snell (p. 144); M. P. Meshenberg (p. 145); E. J. Atkinson (p. 145); F. J. Swan (p. 146); W. Hope-Jones (p. 146); J. Linfoot (p. 147); C. G. Paradine (p. 147); W. G. Bickley (p. 147).

Teaching the complete duffer. 164

Discussion:

B. L. Gimson (p. 164); F. C. Boon (p. 168); F. H. Dodd (p. 172); C. T. Daltry (p. 176); M. P. Meshenberg (p. 176); K. R. Imeson (p. 178); H. H. F. Miller (p. 178); D. J. Milner (p. 179); E. H. Neville (p. 179).

Annual Meeting of the Mathematical Association, 1938. 5

Report of the Council for 1937. 6

The new Teaching Committee. 148

An appeal. 372

MATHEMATICAL NOTES.

Author.	No.	Title.	Page.
A. G. Allender.	1307	Trigonometrical tables.	299
W. R. Andress.	1310	Note on a certain identity.	380
A. A. Krishnaswami Ayyangar.			
	1313	Postscript to Note 1229.	385
	1335	A mysterious elimination.	493
	1341	Note on Notes 1261, 1262 and 1274.	502
G. L. Beach.	1304	"Why all this fuss" about methods?	298
W. G. Bickley.	1324	An adventure with limits.	404
G. W. Brewster.	1338	Rational triangles.	496
	1340	Area of a triangle.	501
J. Buchanan.	1305	On Notes 1262 and 1263.	299
E. W. Burn.	1334	A note on solid geometry.	492
H. W. Chapman.	1327	A point in the teaching of integration.	407
N. R. C. Dockeray.	1330	On Notes 1262, 1263.	488
Sir Frank Dyson.	1278	Attraction of spheroids.	78
M. F. Egan.	1331	The exponential, logarithmic and binomial series for a complex variable.	489
I. M. H. Etherington.			
	1323	$2=4$; a new proof.	403
W. Fabian.	1322	The sum of a harmonical progression.	402
H. G. Forder.	1279	Steiner's theorem on incentres and ecentres.	79
	1280	A question in conics.	82
	1281	A theorem on the orthopole.	83
	1284	A theorem of Newman and a theorem of Hurwitz.	181
N. M. Gibbins.	1291	Area of a triangle.	188
	1328	The complete pentagon.	407
R. Goormaghtigh.	1285	A property of the triangle.	183
T. A. Grocock.	1337	Teaching the complete duffer.	495
C. H. Hardingham.	1286	Triangle properties.	184
H. A. Hayden.	1311	A proof of the identity in Note 1310.	382
G. Highdooc.	1325	Three curious problems.	406
H. Hilton.	1303	On C. N. Srinivasiengar's note on singularities of plane curves given by parametric equations.	298
W. J. Hodgetts.	1287	A geometrical problem.	185
	1314	A suggestion for bridging the gulf between the queer alternatives mentioned in Note 1229.	388
K. R. Imeson.	1288	Rider work in geometry.	186
P. K. Kashikar.	1300	On Note 1270.	297
B. E. Lawrence.	1296	A note on Pythagorean numbers.	291
C. D. Langford.	1289	Geometric figures with integral sides for illustrating Apollonius' theorem.	187
	1290	Note on a curious number property.	188
	1306	Note on Gleaning 1153.	299
	1333	A dissection proof.	492
E. P. Lewis.	1320	The addition formulae.	399
W. L. Marr.	1292	Morley's triangle.	189

Author.	No.	Title.	Page.
A. G. Matthewman.	1343	The transformation of quadratic forms to sums of squares.	506
	1344	Lagrange's equations.	508
F. G. Maunsell.	1301	The real points of intersection of two conics with one focus in common.	297
E. A. Maxwell.	1312	Comment on Note 1229.	383
N. K. Narasimha Murthy.	1326	The general solution of $ax+by=c$.	406
E. H. Neville.	1277	Notation for the quarterperiods of Jacobian elliptic functions.	78
	1294	" A curious rectangle " (Note 1261).	288
	1295	A question in conics (Note 1280).	290
	1298	Interpolation extraordinary.	295
	1308	The evaluation of definite integrals in terms of inverse functions (Note 1278).	377
	1309	The contact of a variable circle with two fixed circles.	378
R. A. Newing.	1332	Dynamical equations of motion; moving origin of moments.	491
H. Orfeur.	1302	Concerning Note 1259.	298
C. G. Paradine.	1299	A problem in algebra.	295
J. H. Pearce.	1316	Volume of a tetrahedron.	392
C. G. Pendse.	1321	A note on mathematical expectation.	399
D. K. Picken.	1317	The circular points at infinity.	393
A. P. Rollett.	1293	On Note 1261: " A curious rectangle ".	287
H. W. Richmond.	1282	A topological puzzle.	180
A. W. Siddons.	1283	On relative velocity.	180
P. J. Smith.	1336	A trisector device.	494
V. Thébault.	1319	Hexagones inscriptibles remarquables.	395
C. O. Tuckey.	1329	A diagram for the solution of triangles.	488
	1339	Res θ.	497
G. W. Ward.	1342	Approximating to quadratic surds.	503
P. W. Wood.	1318	Cubic envelopes (Note 1280).	395
Editorial.	1297	On Note 1258.	293
	1315	On Note 1287.	391

REVIEWS AND NOTICES.

Author.	Title.	Reviewer.	Page.
